

I am a strong supporter of XM Satellite radio. It offers music that I enjoy listening to, but is not played by any local radio station. They offer a wide variety of music, as well as sports and news programs. It is ludicrous to state that the simple fact that XM also has local traffic and weather reports is a reason that people do not listen to their local stations any more. Maybe if the stations spent more time trying to offer different music (except for the same nine songs played in a loop all day) they would have a stronger backing! I urge you to reject the National Association of Broadcasters' petition number 04-160. Please help support XM satellite radio - they really do play better music than the local channels!
